

## AGM2014 notice

The RAANZ 2014 AGM will be held at

**CRAC Clubrooms Rangiora Airfield**  
**Saturday 22 November 2014**  
with a warm-up from 10:30am for take-off at **11:00am**.

Full details will be posted on the [RAANZ website](#) as they are received.

Time for your club to think about **who will represent you** at the AGM, **quality candidates** for the exec, and **good ideas** to promote RAANZ and microlighting in general.

Note: It is important that we have a quorum of 50% of current members in person or by proxy for any significant business to be carried out. If your club will not have a member representing you at the AGM, please ensure you have given your proxy to someone attending. You can give your proxy (and any instructions) to the Chair or any other person attending. See [here](#) for proxy forms.

## RAANZ 2014 North Island roadshow

Colin Alexander (RAANZ TECH ) and Bill Penman (RAANZ OPS) on-

- Presenting your aircraft for annual inspection
- General technical issues and discussion
- Presenting yourself for flight test/renewals
- General operational issues and discussion

Sun 07 Dec	1400-1700	<b>Auckland Regional Microlight Club</b>	Parakai airfield

## RAANZ 2015 national fly-in

Hosted by Central Hawkes Bay Aero Club  
**Waipukurau Airfield**  
**March 7-8 2015**

Advance notice- more details on our website as planning progresses

## RAANZ website changes

We are moving the RAANZ website from a sever In the RAANZ office to an external hosting service- partly because of a slow and sometimes unreliable internet link via Orcon rural broadband, also faster for users and cheaper with more services for RAANZ.

Moving to the new site is progressing- the **basic website** is up and running with a few dud links, but online services using the database are still to be brought up- this includes **exams, CMVs, FPVs, myRAANZ and general database access.**

We expect all will be sorted in the next few days, and over the next few months we will make use of some of the additional services available to us, including things like event calendars and a smarter marketplace.

Meantime, please be patient!
